ANNUAL REPORT
FOR 2021

ABOUT AUTREY MILL

The Autrey Mill Nature Preserve and Heritage Center of today was built under the leadership and vision of the board, talented staff, and local government officials. Identified as a potential nature preserve by Fulton County in 1972 but not purchased, advocates stepped up when zoning threatened the property in 1987. This grassroots effort saved the woodland's unique environment and the site of the old "Autrey" grist mill. It also prevented the demolition of the historic buildings on the property. The vital help of generous public and private supporters and the indispensable work of volunteers were key to the organization's success and still are to this day.

The founders of Autrey Mill established a tax-deductible 501 (c)3 nonprofit association and signed their first lease with Fulton County, to operate in September 1988.

Upon the incorporation of the City of Johns Creek in 2006, Autrey Mill officially became a city park and preserve. This created a unique partnership with the City of Johns Creek and Autrey Mill Nature Preserve Association.

Autrey Mill's mission is **to create a destination and educational resource to inspire exploration, appreciation, and preservation of the natural environment and local history.** The Association is a proud steward of the preserve, historic buildings, and provides all the environmental, heritage, and event programming offered to the community.

BOARD OF DIRECTORS

As a community and organization, we grew and flourished during another year of change and uncertainty. We had an overwhelming community demand for our Summer Camp programs, making this year one of the most successful Summer Camp seasons yet! With the support of generous donors, volunteers, staff, and Autrey Mill Board, we were able to bring back our cherished family events, Spooky Mill and Scout Day rounding out another successful year!
